Southern Grenadines Water Taxi Association GARBAGE COLLECTION SYSTEM

The Southern Grenadines Water Taxi Association (SGWTA) through a grant from the GEF, SGP implements this project to put in place an effective garbage collection and disposal system in TCMP to protect the marine environment from the amount of garbage entering the sea.

Tobago Cays Marine Park (TCMP)

The plants and animals in the Tobago Cays Marine Park are important to the citizens of St Vincent and the Grenadines.

They reflect the rich heritage and culture of the nation.

We therefore pride ourselves on their care and conservation. We want you to treasure them.

As you visit, tour or engage in the various activities of the area, we want you to make many memories; while we want the animals and plants to remain here for future generations.

We encourage you to:

1. Stay in sandy areas
2. Take lots of photographs
3. Admire the animals and plants - give them space to live in harmony with their environment
4. Use moorings for your yachts - anchors hurt breeding/nursery grounds
5. Put out unattended fires
6. Take your garbage with you
7. Support the local vendors
8. Tell a friend
